Nexora Technologies Pvt. Ltd.

Laptop and Device Policy

Document ID: IT-002

Department: IT

Version: 2.3

Effective Date: 2026-02-15

Owner: IT Asset Management

Classification: Internal - All Employees

1. Standard Devices

Role	Standard Laptop	Specification
L1 to L3, non-engineering	Dell Latitude 14	16 GB RAM, 512 GB SSD
Engineers and designers	Dell Latitude 14 or MacBook Pro 14	32 GB RAM, 1 TB SSD (MacBook Pro)
L4 and above	MacBook Pro 14 or Dell Latitude 14	32 GB RAM

Every employee also receives one external monitor, a keyboard and a mouse for their desk.

2. Refresh Cycle

Laptops are refreshed every 3 years (36 months). Earlier replacement is possible only if the device is beyond repair, as certified by IT.

3. Loss, Theft and Damage

A lost or stolen device must be reported to the IT Helpdesk and the Security team within 24 hours. File a police complaint for theft. In case of loss through negligence, the employee may be asked to pay up to the depreciated value of the device.

4. Security Settings

- Full-disk encryption (BitLocker or FileVault) is mandatory and enforced by NexMDM.
- USB mass storage devices are blocked by default. Exceptions need approval from the Security team.
- Do not install unauthorised software. Requests go through the Software Request process (IT-004).

5. Personal Devices (BYOD)

Personal phones and tablets may be used only for email, Slack and calendar, and must be enrolled in NexMDM. Personal laptops are not allowed to access company source code or customer data.

6. Return at Exit

All company devices and accessories must be returned to IT on or before the last working day. Final settlement is released after IT confirms the return.
