1. About NexAnalytics

NexAnalytics is Nexora's business intelligence product for building dashboards and reports from company data. The current version is 3.2.

2. Which data sources are supported?

NexAnalytics connects to PostgreSQL, MySQL, BigQuery and Snowflake, and can also import CSV and Excel files.

3. How often is data refreshed?

Plan	Refresh Frequency
Starter	Every hour
Professional	Every 15 minutes
Enterprise	Real-time streaming

4. What export formats are available?

Dashboards and tables can be exported as PDF, CSV and XLSX. Scheduled email delivery of reports is available on Professional and Enterprise plans.

5. Are there data size limits?

The Starter plan supports up to 10 million rows per dataset. Professional supports up to 100 million rows. Enterprise has no fixed row limit.

6. Does NexAnalytics support forecasting?

Yes. The Forecasting module supports ARIMA and Prophet models and is included in Professional and Enterprise plans.

7. Is there a mobile app?

Yes. NexAnalytics Mobile is available for iOS and Android and offers view-only access to dashboards.
